Professional Summary

DevOps Engineer with **5 years of experience in AWS cloud infrastructure, Kubernetes administration, CI/CD pipeline engineering, and Infrastructure as Code (Terraform)**. Experienced in managing **production-grade EKS clusters, Linux environments, and high-availability microservices architectures**. Proven success in reducing **MTTR by 35%**, improving deployment reliability by **30%**, and maintaining **99.9% SLA compliance**. Skilled in **incident management, disaster recovery, cloud networking, and release engineering**.

SKILLS

Cloud Platforms:	AWS (EKS, EC2, S3, ECR, IAM, RDS, Lambda, ASG)
Container Orchestration:	Kubernetes administration, Docker, Helm, Cluster Autoscaler
CI/CD Engineering:	Jenkins, GitLab CI/CD, GitHub Actions, Nexus Artifactory
Infrastructure Provisioning:	Terraform, Ansible, AWS CloudFormation
Monitoring & Observability:	Datadog, CloudWatch, Splunk, ELK Stack, Prometheus, Grafana
Operating Systems:	Linux (RHEL, Ubuntu)
Cloud Networking:	VPC, Load Balancers, Security Groups
Scripting & Automation:	Python, Shell scripting, YAML, Finacle scripting
Deployment Strategies:	Blue-Green, Canary, Rolling Updates
DevOps & SRE Practices:	Incident Management, RCA, SLA/SLO tracking, MTTR Optimization, High Availability Architecture

WORK EXPERIENCE

Technology Analyst

TCS 04/2026 - 06/2026

- Allocated to the Xcel project for enterprise cloud application onboarding.
- Completed hands-on learning in **AWS, Terraform, Jenkins, Git, Python, Docker, and Kubernetes** to prepare for project responsibilities.
- Built **CI/CD pipelines** and **Infrastructure as Code (IaC)** practice environments in a lab setup.
- Worked with internal **project documentation, deployment processes, and DevOps best practices**.
- Collaborated with the project team during onboarding before project release due to delivery changes.

Technology Analyst

Infosys 01/2023 - 03/2026

- Managed **production-grade Kubernetes clusters on AWS EKS** supporting microservices-based enterprise workloads with **99.9% SLA compliance**.
- Designed **highly available and multi-AZ architectures**, ensuring fault tolerance and minimal downtime.
- Implemented **multi-region disaster recovery (DR) strategy** using cross-region backups, AMI replication, and database snapshot automation.
- Engineered **CI/CD pipelines using Jenkins and GitLab CI/CD** to streamline build, test, and release workflows across environments.
- Executed **Blue-Green and Canary deployment** strategies, increasing release **stability by 30%**.
- Provisioned and maintained infrastructure using **Terraform and Ansible**, reducing manual configuration **effort by 40%**.
- Strengthened observability through **Datadog, CloudWatch, and Splunk** dashboards, reducing **MTTR by 35%**.
- Led **production incident response** processes, conducted **Root Cause Analysis (RCA)**, and enforced preventive remediation strategies.
- Provisioned and secured **IAM roles, VPC networking, and Load Balancers**.
- Optimized **Kubernetes autoscaling policies and resource allocation** to improve cluster performance and cost efficiency.
- Supported full **DevOps lifecycle including build management, release engineering, deployment, monitoring, and production support**.

Senior Systems Engineer

Infosys 02/2022 - 12/2022

- Streamlined enterprise workflows using advanced Shell scripting, reducing operational dependency **by 60%**.
- Designed idempotent job orchestration logic to improve processing **throughput by 25%**.
- Integrated application services into **CI workflows** for automated validation and structured release management.
- Conducted performance benchmarking using JMeter, improving application **efficiency by 25%**.
- Applied monitoring best practices using **Datadog, Splunk, and CloudWatch** to maintain **SLA compliance**.
- Reduced downtime through structured log aggregation, alerting, and health monitoring pipelines.
- Collaborated with development and infrastructure teams to strengthen deployment governance and stability.

Systems Engineer

Infosys 06/2021 - 01/2022

- Administered **Linux servers, including file management, user and group management, disk management**, and basic network configuration.
- Performed **manual application deployments** across development and UAT environments.
- Managed **Git repositories, including branch creation, merges, and version tracking**.
- Assisted in build validation and deployment support activities.
- Monitored system logs and resolved environment-level issues.
- Deployed and maintained** Linux services and scheduled automation tasks.

Education

Bhagwan Parshuram Institute of Technology

Rohini, New Delhi

Bachelor of Technology in Electronics and Communication Engineering

2016-2020

Certifications

- Infosys Certified AWS Public Cloud Associate.
- Google Certified Cloud Digital Leader.
